ABOUT ME

I am an aspiring engineering student deeply passionate about Python development, Data Structures, and Algorithms (DSA). Driven by continuous learning and technical innovation, I focus on solving complex algorithmic challenges and building efficient backend systems. My core interests lie in architectural efficiency, logical problem-solving, and developing impactful technical projects that bridge robust software engineering with machine learning concepts.

EDUCATION

Course / Degree	College / University / School	Year	Marks (%)
B.Tech (2nd Sem)	Indian Institute of Information Technology, Ranchi	2025-29	79.8%
B.Tech (1st Sem)	Indian Institute of Information Technology, Ranchi	2025-29	70.0%
Class XII (Senior Secondary), CBSE	CBSE Affiliated School	2025	80.0%
Class X (Secondary), CBSE	CBSE Affiliated School	2023	93.0%

SCHOLASTIC ACHIEVEMENTS

- **SIH Internal Hackathon Qualifier:** Qualified with the IBVAP (Intelligent Border Video Analytics Platform) project.
- **Qualified for IOQJS:** Indian Olympiad Qualifier in Junior Science [2023].
- **School Rank 2 in NSO:** SOF National Science Olympiad [2021].
- **School Rank 1 in IEO:** SOF International English Olympiad [2021].

SKILLS & INTERESTS

Programming Languages: Python, C, HTML5, CSS3, JavaScript

Libraries & Frameworks: PyTorch, OpenCV, PyTesseract, CUDA, PyQt5

Tools: Unreal Engine 5, Blender (3D Modeling), Git, GitHub, SQL

Core Interests: Data Structures & Algorithms (DSA), Machine Learning (ML), Artificial Intelligence (AI), Software Development

PROJECTS

- **Intelligent Border Video Analytics Platform (IBVAP):** Selected as a qualifier project for the SIH Internal Hackathon. Developed core functionalities utilizing Python and advanced vision/learning libraries to analyze and process border security video feeds.
- **Forza Horizon Telemetry Dashboard:** Engineered a real-time data extraction and telemetry visualization tool. Built the backend logic in Python and designed a responsive, interactive graphical user interface using PyQt5.

COMPETITIVE PROGRAMMING

- **CodeChef:** 2-Star Coder (Peak Rating: 1551) with over 160+ algorithmic problems solved.
- **Codeforces:** Active Competitor (Max Rating: 966) with over 50+ problems solved.

OTHER AREAS OF INTEREST

- **3D Design & Simulation:** Enthusiast in technical environments, environment rendering, and performance optimizations inside Unreal Engine 5 and Blender.
